

*Feel-good atmosphere
for long hours on the patio*

The Lux/Lux Design Light Bar and the Tempura Heating System help you create a cosy atmosphere and allow you to enjoy your patio *for a far longer time*

Thanks to the Tempura Heating System, parties never need to be moved indoors when the weather turns cold.

*True patio comfort –
with warmth and light*

Enjoy your patio even in the evening or when the weather turns a little fresh

With the **Lux/Lux Design Light Bar** and the **Tempura Heating System**, you can also enjoy time on your patio when dusk sets in and on cooler days. While the light bar immerses your patio in atmospheric light, the heating system ensures that the patio is cosy and warm – giving you a longer patio season.

Comfort with the remote control

You can operate the **WeiTronic Remoto** remote control to adjust shade, heating and light from your favourite chair. You can even adjust the light and heating.

*It's all in your hands:
clever accessories for your comfort*

The perfect match – everything coordinated

weiner not only stands for first-rate awnings, conservatories and patio roofs; we also offer you convenient ways to operate all the electronic components such as the **Lux Light Bar** and the **Tempura Heating System**. Since everything comes from one and the same source, all the products are perfectly coordinated.

There's a system to the intelligent accessories

Do you already have an awning and would like to add lighting and heating? Not a problem with weiner products! The light bar and heating system can also be retrofitted to the wall. Needless to say, this is also possible if you own a different make of awning.

weiner accessories with huge selection of colours

Exclusively available from weiner: choose from 47 standard frame colours, 8 scratch-resistant and robust trendy conservatory colours (5% surcharge) as well as another 200 special RAL colours for your **Tempura Heating System** or the **Lux Light Bar**. Even if retrofitted, the casing colour can be almost exactly matched to your awning.

Benefit from full colour consistency – at weiner every product is powder coated in our own factory.

Atmospherically dimmed lighting in no time at all

With the **WeiTronic** remote control, you can dim the lighting to exactly how you like it.

A cosy atmosphere well into the evening

Light for a sparkling atmosphere on your patio

Whether straight or round shapes are more your style of living – weinor offers the right design to match any taste!

Create an impressive atmosphere for yourself and your guests. The weinor **Lux** or **Lux Design** Light Bar can be easily mounted on a house wall and operated by remote control. This means you can fashion the right atmosphere for a grill party or a romantic moment with your partner on the patio just as the mood takes you.

Practical, compact and flexible – the **Tempura** radiant heater can be installed anywhere on your patio even if you don't have an awning.

Pleasant heat makes you feel good in the outdoors

The Tempura Heating System emits snug temperatures

Very pleasant warmth thanks to weinor's ultra modern infra-red technology

weinor's **Tempura** Heating System works on the same principle as the sun. It sends electromagnetic waves that are absorbed by the skin and converted into heat. People find the resulting warmth especially pleasant. To pinpoint where the heat should flow, the lamp's upwards movement is infinitely adjustable and it can be tilted down to a 40° angle.

An outstanding feature of the **Tempura** is its attractive, compact design. The radiant heater's small size is made possible thanks to the high efficiency factor offered by short-wave technology. The manageable, lightweight device is ideal for indoor and outdoor use – in a conservatory or weinor **Glasoase**®, for example.

The patio heating makes the season longer

The heating system **Tempura** makes the patio a very pleasant place to be, even in cooler weather. The radiated heat covers a relatively large area. The housing can be adjusted upwards and downwards as required.

CLIC-FIT With an exceptionally long service life of 5,000 hours, you will find these quality Philips heating tubes very convincing. Replacing the tubes is quick and simple with the Philips Click-fit-System.

Quick and easy to install

Both the light bar and the heating system can be installed virtually anywhere and regardless of whether an awning is there or not.

We offer the very highest quality

weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service, so you can enjoy your **Lux/Lux Design Light Bar** for a long time.

Proven top quality

Accessories for the highest demands

Made in Germany – certified top weinor quality

Neverending beauty

The casings for the **Lux/Lux Design Light Bar** and the **Tempura Heating System** are made of high-quality corrosion-proof materials.

Safety tested
The **Lux/Lux Design Light Bar** is also safety tested by Germany's TÜV organisation (IP 44 rating).

The **Tempura Heating System** can also be left out in the rain and needs no special splash guards. Its suitability for use outdoors has been approved by the TÜV who carried out a splash water test (IP 24 rating).

Overheat protection

The integrated cooling fins and the open construction ensure that the casing never overheats.

The ideal advice from your expert

The best way to find out how to set up the ideal lighting and heating for your patio is to contact one of our experts. Our specially trained dealers are more than happy to assist you and give you sound advice on all the technical and aesthetic details this involves.

Colour consistency

Every part or component from weinor has the same powder coating – for colour consistency and identical gloss level.

No matter what you want to use your patio for, weinor has the right product for you – awning, patio roof, Glasoase® and conservatory

As an experienced specialist, your weinor dealer will help you throughout the process, from planning to completion. They will help make your patio dreams come true and will support you with advice and help. That way you stay on the safe side at all times.

Important Informations:

For textile sun protection: Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fish-bone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for

protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

For patio roof, Glasoase®, conservatory: Let a qualified conservatory builder explain the causes of condensation and how it can be avoided at the planning stage.
